

OSNIAS-ID — KK NETWORK REGISTRY (01–99)
Annex registry · Publication candidate · 9 September 2026

KK	Network / Namespace	Category	Execution / VM	Status	Escrow capability	Osnias role / allocation rationale	Escrow / control mechanism
01	Ethereum	Public EVM	EVM	Allocated	Yes	Reference EVM network	Smart contracts / Solidity
02	Sei EVM	Public EVM	EVM	Allocated	Yes	Canonical Osnias chain / settlement	EVM smart contracts
03	Arbitrum One	Public EVM	EVM L2	Allocated	Yes	Secondary EVM / partner integration	EVM smart contracts
04	Avalanche C-Chain	Public EVM	EVM L1	Allocated	Yes	Native EVM escrow candidate	EVM smart contracts
05	Base	Public EVM	EVM L2	Allocated	Yes	Native EVM escrow candidate	EVM smart contracts
06	BNB Smart Chain	Public EVM	EVM L1	Allocated	Yes	Native EVM escrow candidate	EVM-compatible smart contracts
07	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
08	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
09	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
10	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
11	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
12	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
13	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
14	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
15	Reserved EVM	Public EVM reserve	TBD	free	To be validated	Future EVM allocation after Osnias technical validation	Must support programmable, auditable escrow
16	Solana	Public non-EVM	SVM / sBPF	Allocated	Yes	Non-EVM escrow via on-chain program	On-chain programs
17	TRON	Public non-EVM	TVM	Allocated	Yes	Non-EVM escrow via smart contract	TVM smart contracts
18	Stellar / Soroban	Public non-EVM	Wasm / Soroban	Allocated	Yes	Non-EVM escrow via Soroban contract	Rust/Wasm smart contracts
19	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
20	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
21	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
22	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
23	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
24	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
25	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow

[illegible]

[illegible]

76	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
77	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
78	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
79	Reserved Network ID	Future public network reserve	TBD	free	To be validated	Future network allocation after Osnias technical validation	Must support programmable, auditable escrow
80	Institutional Rail Reserve	Institutional reserve	N/A	Reserved	N/A	Future institutional rail / central-bank namespace	Reservation only
81	Reserve Bank of Australia (RBA)	Central-bank reserve	N/A	Reserved	N/A	AUD institutional namespace reserve	Reservation only — no implication of network participation
82	Bank of Canada	Central-bank reserve	N/A	Reserved	N/A	CAD institutional namespace reserve	Reservation only — no implication of network participation
83	Monetary Authority of Singapore (MAS)	Monetary-authority reserve	N/A	Reserved	N/A	SGD institutional namespace reserve	Reservation only — no implication of network participation
84	Bank of Japan (BoJ)	Central-bank reserve	N/A	Reserved	N/A	JPY institutional namespace reserve	Reservation only — no implication of network participation
85	Bank of England (BoE)	Central-bank reserve	N/A	Reserved	N/A	GBP institutional namespace reserve	Reservation only — no implication of network participation
86	Swiss National Bank (SNB / BNS)	Central-bank reserve	N/A	Reserved	N/A	CHF institutional namespace reserve	Reservation only — no implication of network participation
87	Hong Kong Monetary Authority (HKMA)	Monetary-authority reserve	N/A	Reserved	N/A	HKD institutional namespace reserve	Reservation only — no implication of network participation
88	European Central Bank / Eurosystem	Central-bank reserve	N/A	Reserved	N/A	EUR institutional namespace reserve	Reservation only — no implication of network participation
89	Federal Reserve	Central-bank reserve	N/A	Reserved	N/A	USD institutional namespace reserve	Reservation only — no implication of network participation
90	Osnias Development	Osnias reserved	Internal	Reserved	N/A	Development namespace	Osnias internal reservation
91	Osnias Test / Certification	Osnias reserved	Internal	Reserved	N/A	Test and certification namespace	Osnias internal reservation
92	Osnias Escrow Infrastructure	Osnias reserved	Internal	Reserved	N/A	Escrow infrastructure namespace	Osnias internal reservation
93	Osnias Oracle Infrastructure	Osnias reserved	Internal	Reserved	N/A	Oracle infrastructure namespace	Osnias internal reservation
94	Osnias Institutional Private Network	Osnias reserved	Internal	Reserved	N/A	Private institutional namespace	Osnias internal reservation
95	Osnias Emergency / Recovery	Osnias reserved	Internal	Reserved	N/A	Emergency and recovery namespace	Osnias internal reservation
96	Osnias Research	Osnias reserved	Internal	Reserved	N/A	Research namespace	Osnias internal reservation
97	Osnias Interoperability	Osnias reserved	Internal	Reserved	N/A	Interoperability namespace	Osnias internal reservation
98	Osnias Future Protocol	Osnias reserved	Internal	Reserved	N/A	Future protocol namespace	Osnias internal reservation
99	Osnias Core	Osnias reserved	Internal	Reserved	N/A	Core protocol reserved namespace	Osnias internal reservation
